

Brush tool SBT-70

Compatible with:

ROV
Tortuga

Mini-ROVs
Observer &
Guardian

The brush tool SBT-70 designed by Subsea Tech, is meant to remove dirt and light marine growth from a metal or concrete surface. It can be used for CVI and NDT inspection.

The brush, which is easily interchangeable, is actionned by a high torque electrical motor.

On smaller vehicles, the rotation force can be counteracted by two remote controlled electromagnets.

Weight in air/water	820g / 270g
Dimensions L x W x h	150mm x 110mm x 80mm
Operational depth	1000 msw
Max. rotation speed	120 RPM
Max. torque	0.7 N.m
Option:	remote controlled electromagnets
